1. What is the name of the author?

2. What is the name of the book?

3. What is the date of publication?

4. What is the publisher's name?

5. What is the title of the first chapter?

6. What is the title of the last chapter?

7. What is the name of the main character?

8. What is the name of the antagonist?

9. What is the setting of the story?

10. What is the plot summary?

11. What is the genre of the book?

12. What is the theme of the book?

13. What is the style of writing?

14. What are the main ideas presented in the book?

15. What are the main characters' motivations?

16. What are the main conflicts in the story?

17. What are the main themes explored in the book?

18. What are the main symbols used in the book?

19. What are the main motifs present in the book?

20. What are the main literary devices used in the book?

21. What are the main characters' relationships?

22. What are the main characters' personalities?

23. What are the main characters' backgrounds?

24. What are the main characters' goals?

25. What are the main characters' challenges?

26. What are the main characters' decisions?

27. What are the main characters' actions?

28. What are the main characters' reactions?

29. What are the main characters' responses?

30. What are the main characters' outcomes?

31. What are the main characters' endings?

32. What are the main characters' fates?

33. What are the main characters' destinies?

34. What are the main characters' endings?

35. What are the main characters' fates?

36. What are the main characters' destinies?

37. What are the main characters' endings?

перпендикулярны к оси шаров. Отклонения не должны превышать 1°.

(Начало ввода в действие, Исп. № 1).

**2.9.** Торцевые поверхности стоков в складах должны быть перпендикулярны к осям проходов. Отклонение не должно превышать 1°.

**2.10.** Допускаются следующие предельные отклонения для строительных единиц сданательных частей:

- 1,5 мм — для длины до 50 см;
- ± 2,0 мм — для длины от 50 до 100 см;
- ± 2,5 мм — для длины св. 100 до 200 см.

(Начало ввода в действие, Исп. № 1).

### 3. ПРИМЕРЫ ПРИЕМКИ

**3.1.** Соединительные части проверяются в дрениаже партиями. Партия должна состоять из соединительных частей одного размера одной марки стали в соответствии с данными документом на изготовление ГОСТ 10692—80.

Максимальный — не более 1 п.

(Начало ввода в действие, Исп. № 1).

**3.2.** Отбор единиц, подлежащих проверке их качества, производится методом случайной выборки из разных мест партии.

**3.3.** Проверка внешнего вида единичных подвергается каждая соединительная часть партии.

Для проверки внешнего вида соединительных частей, изъятых из труб, прошедших 100%-ной контроле качества физических испытаний без разрушения или 100%-ное издавленческое испытание, отбирают не менее 1% соединительных частей из партии.

**3.4.** Для контроля размеров разбирают не менее 40 соединительных частей от партии.

**3.5.** Для проверки перпендикулярности торцевой плоскости оси прохода, скосности осей нарезки резьбы, наружного диаметра и длины отбирают не менее 10 соединительных частей для каждого вида испытаний.

**3.6.** Для проверки качества никелевого покрытия (толщины и сплошности) отбирают не менее 5 соединительных частей от партии.

**3.7.** Для проверки прочности соединительных частей отбирают не менее 1% соединительных частей от партии.

**3.8.** Для получения международных результатов испытаний ходят по одному из показателей по всему проводимому повторному испытанию на удлиненной выборке.

Результаты повторных испытаний распространяются на всю партию.
